

G G G A A T T G T A G T

The image displays a sequence of 11 nucleotide bases: G, G, G, A, A, T, T, G, T, A, G, T. Each base is rendered in a large, bold, sans-serif font. The color of each base is consistent with standard molecular biology color coding: G (yellow), A (green), and T (red). Below each base, there is a semi-transparent, multi-colored shadow or reflection, giving the sequence a 3D appearance. The bases are arranged in a single horizontal line.
